Customer Reviews

Disclaimer: I was given this product free to try with the understanding that I would write an honest review of it. My review has not been biased. First off, this book was a lot thinner than I expected. That's a good thing - don't misunderstand me. The problem I've had in the past with other books for the MAT is that they try to cover every conceivable possibility. This makes them huge, unwieldy, and I find that I stress about trying to learn/remember everything in them that I either give up, or I just barely skim over the information. It's too much. I appreciate the size because the authors are very concise. There is one page about test-taking tips. They don't explain, they don't go into detail, they just make 20 well thought-out suggestions about how to test better. They then explain what the test is and take one page to explain what an analogy is. Four pages are dedicated to helping you understand relationships between words and how to be successful on those types of questions. They give question samples and explanations. They break relationships down into only three categories: Association, Inclusion, and Meaning. Eight pages are spent on Strategies. They explain different strategies and give examples to help you work through them. Some of the strategies are common sense to some of us: Eliminate answers, use logic, read carefully. Others are strategies I have only seen in this book: Trap of familiarity, face value, use jujitsu (I won't go into detail about how you use jujitsu on this exam - you'll have to buy the book and find out!) There's one page of final notes that just summarize the most important things, like not panicking and making sure you're using your time wisely (you don't want to run out!!) The section you're waiting for is next.
