"A Supposedly Fun Thing I'll Never Do Again" is a collection of seven essays originally published between 1992 and 1996. They range over a variety of topics and, while somewhat uneven in quality, demonstrate that David Foster Wallace is one of contemporary America's most intelligent and imaginative writers. The best of the essays are two that were originally published in Harper's magazine, "Getting Away from Being Pretty Much Away from It All" and the title essay, "A Supposedly Fun Thing I'll Never Do Again". In "Getting Away from Being Pretty Much Away from It All", Wallace relates a visit to the Illinois State Fair in 1993 in a style that alternates between intellectual ponderousness and hilariously obsessive description and commentary on the minutest details of his experience. Approaching his task with the wonder of a child, Wallace, in a passage illustrative of his style (or at least one aspect of it), reflects: "One of the few things I still miss from my Midwest childhood was this weird, deluded but unshakable conviction that everything around me existed all and only For Me. Am I the only one who had this queer deep sense as a kid?-that everything exterior to me existed only insofar as it affected me somehow?-that all things were somehow, via some occult adult activity, specially arranged for my benefit? . . . The child leaves a room, and now everything in that room, once he's no longer there to see it, melts away into some void of potential or else (my personal childhood theory) is trundled away by occult adults and stored until the child's reentry into the room recalls it all back into animate service.
